DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Benveniste (US 7,180,905).

Referring to Claim 1, Benveniste teaches a method for communicating data between terminals in heterogeneous communications network, comprising:

broadcasting periodically a first beacon in a first signal format, the first beacon defining a start of a contention period and a start of a contention free period, the contention free period for communicating data between the terminals (see col. 9, lines 23-31); and

Application/Control Number: 10/774,200

Art Unit: 2618

broadcasting a second beacon in a second signal format during the contention free period, the second beacon defining the start of the contention period and the start of the contention free period (see col. 9, lines 31-42).

Claim 8 has similar limitations as claim 1.

Referring to Claim 2, Benveniste also teaches the contention free period includes assigned and unassigned slots, and in which the second beacon is broadcast during time periods of unassigned slots (see col. 8, lines 22-31).

Referring to Claim 3, Benveniste also teaches broadcasting a plurality of second beacons in a plurality of different signal formats during the contention free period (see col. 10, lines 57-66).

Referring to Claim 4, Benveniste also teaches the first signal format predetermined (see col. 10, lines 9-17).

Referring to Claim 5, Benveniste also teaches the first signal format based on a priority of terminals in the heterogeneous network (see col. 8, lines 22-31).

Referring to Claim 6, Benveniste also teaches the first signal format based on a bandwidth of terminals in the heterogeneous network (see col. 6, lines 59-65).

Referring to Claim 7, Benveniste also teaches the slots assigned according to a bandwidth of terminals in the heterogeneous network (see col. 16, lines 41-52).

Referring to Claim 8, Benveniste also teaches the slots assigned according to a priority of terminals in the heterogeneous network (see col. 8, lines 22-31).

Referring to Claim 9, Benveniste also teaches the terminals of the heterogeneous network sharing a single frequency band (see col. 6, lines 56-67).

Application/Control Number: 10/774,200 Page 4

Art Unit: 2618

Referring to Claim 11, Benveniste also teaches the coordinator communicating with any terminal in the network in any predetermined signal format (see col. 13, lines 2-13).

Referring to Claim 12, Benveniste also teaches the first and second terminal communicating indirectly with each other via the coordinator terminals (see col. 13, lines 49-59).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eugene Yun whose telephone number is (571) 272-7860. The examiner can normally be reached on 9:00am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew D. Anderson can be reached on (571)272-4177. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
